

# JOHN A. ROBLES PEREZ

## TECHNICAL SKILLS

---

TypeScript, React.js, Node.js, Express.js, GraphQL Java, Vite.js, Next.js, JavaScript(ES6+), HTML5, (S)CSS3, JSON, Git/GitHub/GitLab, Auth0, AWS, Pulumi, PostgreSQL, SQLite, Heroku, jQuery, React Native, Python, PHP, Contentful, HUBL + HTML

## WORK EXPERIENCE

---

**LeadWire LLC**, San Juan, PR

**April 2024 – Present**

### **Lead Full Stack SW Developer**

- Effectively led my team and managed projects, demonstrating my proficiency in architecting the infrastructure of complex applications.
- Delivering robust solutions to enhance performance and resolve potential application errors, thereby ensuring optimal functionality and superior user experience.
- We leverage Heroku and Netlify as our cloud architecture, employ React for the frontend, and utilize Node.js and Express.js for the backend. Our database infrastructure comprises Postgresql with Prisma and GraphQL, enabling robust and efficient data management.
- Engage in the entire Software Development Life Cycle (SDLC), encompassing requirements gathering, thorough documentation, proficient coding, meticulous code review, seamless implementation, comprehensive testing, and report generation, while integrating Jira as an agile methodology. Actively contribute to Continuous Integration/Continuous Deployment (CI/CD) processes to ensure a streamlined development journey.

**Scoreinc.com, Inc.**, Mayaguez, PR

**April 2023 – Present**

### **Full Stack SW Developer**

- Develop comprehensive front-end and back-end solutions using a range of cutting-edge technologies, including React, TypeScript, Node, Contentful, Bit, Auth0, and AWS.
- Provide guidance, leadership, and solutions to my team, facilitating goal achievement while actively contributing to their coding skills growth through constructive feedback and leveraging my experience.
- As a key contributor to an ongoing project at a prominent global company, actively involved in development and driving a 50% improvement in project performance through close collaboration with the team and leveraging expertise in software development.
- Participate in all facets of the Full Software Development Life Cycle (SDLC), encompassing requirements gathering, meticulous documentation, proficient coding and execution, thorough code review and testing, seamless implementation, and generation of comprehensive reports. Actively contribute to Continuous Integration/Continuous Deployment (CI/CD) processes throughout the development journey.

**The Cervantes Group, Inc.**, San Juan, PR

**Aug 2022 – April 2023**

### **SW Engineer**

- Develop solutions for file transfers (inbound/outbound traffic) interfacing with client and internal systems, applications, SW and platforms using XML and JSON.
- Participate in the full Software Development Life Cycle (SDLC) including requirements gathering, documentation, coding/execution, code review/testing, implementation and reports creation.
- Develop solutions with JavaScript, PHP and Ninja JS for Microjuris Application for customer named Centrix participating in all phases of the Agile Software Development Life Cycle (SDLC).

- Generate reports with JasperReports, an open-source tool which allows to write and edit report in Sodalís Application while creating and configuring API's in Unify Application.
- Create and develop Transaction Request API's (Payment Gateway).
- Meet with cross-functional teams to gather and document project and client requirements.

**Health Computer Systems, Inc., San Juan, PR**

**Nov 2021 – Aug 2022**

**Developer**

- Designed, analyzed, documented, and deployed applications utilizing XML, JSON, Java, Maven, Spring Boot, SFTP protocol, AWS, and MS SQL Server.
- Developed file sharing, sending and transfer solutions interfacing with client and internal systems, applications, SW and platforms using XML and JSON.
- Performed tests and updates within XML, JSON environments in addition to gathering requirements and producing documentation with instructions for execution of coding solutions, design and layouts for application.
- Managed and maintained Windows Server and SW written in Java, Maven, XML, JSON offering technical support engineering L1-3.
- Updated Technical User Manuals and created and managed API configurations.
- Managed customer technical support system called GoToAssist in which through tickets it contains their needs or doubts about our system or issues related.

---

## **EDUCATION AND CERTIFICATIONS**

**Education:**

- **University of Puerto Rico, Mayaguez**
  - Bachelor of Science in Software Engineering (May 2022)

**Certifications:**

- **Certified HubSpot CMS Developer (Aug 2024)**
- **Advanced CSS and Sass** Udemy Academy (March 2023)
- **Introduction to Business Data Analysis** Udemy Academy (March 2023)
- **Build Responsive Real-World Websites with HTML and CSS** Udemy Academy (March 2023)
- **JavaScript Course** Udemy Academy (December 2022)
- **Practical Ethical Hacking** Udemy Academy (August 2020)
- **SQL Basic Concept and Techniques** UPRM (May 2020)
- **Cybersecurity – Basic Concept and Techniques** UPRM (May 2020)
- **React Native - The Practical Guide** Udemy Academy (June 2019)
- **Python Masterclass** Udemy Academy (January 2019)
