## EXPERIENCE

### ● [LeadWire LLC, San Juan, PR](#)

#### LEAD FULL STACK SOFTWARE DEVELOPER

April 2024 – Present

- Led team management and project architecture for complex applications.
- Delivered robust solutions enhancing performance and resolving application errors to ensure superior user experience.
- Utilized Heroku and Netlify for cloud architecture; implemented React for frontend and Node.js with Express.js for backend.
- Managed PostgreSQL database with Prisma and GraphQL for efficient data handling.
- Engaged fully in SDLC including requirements gathering, documentation, coding, code review, testing, implementation, and reporting.
- Integrated Jira agile methodologies and contributed actively to CI/CD processes ensuring smooth deployments.

### ● [Scoreinc.com, Inc., Mayaguez, PR](#)

#### FULL STACK SOFTWARE DEVELOPER

April 2023 – April 2024

- Developed full stack solutions using React, TypeScript, Node.js, Contentful, Bit, Auth0, and AWS.
- Provided team guidance and leadership, promoting skills development through constructive feedback.
- Key contributor to a global project improving performance by 50% through collaboration and expert development.
- Participated in all SDLC phases including requirements, documentation, coding, code review, testing, implementation, and reporting.
- Supported CI/CD processes throughout the development lifecycle.

### ● [The Cervantes Group, Inc., San Juan, PR](#)

#### SOFTWARE ENGINEER

August 2022 – April 2023

- Developed file transfer solutions interfacing with client and internal systems using XML and JSON.
- Participated in full SDLC phases including requirements gathering, documentation, coding, testing, implementation, and reporting.
- Developed JavaScript, PHP, and Ninja JS solutions for Microjuris Application serving client Centrix.
- Created reports using JasperReports and configured APIs in Unify Application.
- Designed and developed Transaction Request APIs (Payment Gateway).
- Collaborated with cross-functional teams to gather and document project/client requirements.

### ● [Health Computer Systems, Inc., San Juan, PR](#)

#### DEVELOPER

November 2021 – August 2022

- Designed, analyzed, documented, and deployed applications using XML, JSON, Java, Maven, Spring Boot, SFTP, AWS, and MS SQL Server.
- Developed file sharing and transfer solutions interfacing with various systems using XML and JSON.
- Conducted tests and updates; gathered requirements and produced documentation with execution instructions.
- Managed and maintained Windows Server and Java-based software, providing technical support (L1-L3).
- Updated technical user manuals and managed API configurations.
- Managed customer technical support system (GoToAssist) handling tickets related to system issues and inquiries.

## EDUCATION

### ● [University of Puerto Rico, Mayaguez](#)

#### BACHELOR OF SCIENCE IN SOFTWARE ENGINEERING

Graduated May 2022

## SKILLS

Technical Support and Troubleshooting	Software Development Life Cycle (SDLC)	Technical Documentation
API Development	JasperReports	Agile Methodology
CI/CD	Jira	MS SQL Server
SFTP	Maven	Spring Boot
HUBL + HTML	Contentful	PHP
Python	React Native	jQuery
Netlify	Heroku	SQLite
PostgreSQL	Pulumi	AWS
Auth0	Git / GitHub / GitLab	JSON
CSS3 / SCSS	HTML5	JavaScript (ES6+)
Next.js	Vite.js	Java
GraphQL	Express.js	Node.js
React.js	TypeScript
